IJMSNR international journal has not encouraged papers those dealing with modifications of routine methodology. The IJMSNR strongly discourages duplication/reduplication of data already published in any other journals (even when certain cosmetic changes/additions are made send it for publication). If and when duplication is detected after publishing in IJMSNR, the journal will be forced to ‘retract’ such articles. This is very important message to the authors. Articles based on work carried out with proper guidelines and permission the parent institutions will be encouraged. But articles which will be made in private nursing homes and other non-recognized hospitals/research institutes will not be entertained.
