

Impact of International Journal of Medical Sciences and Nursing Research in the research World

Introduction

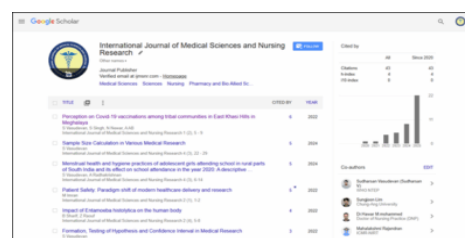

International Journal of Medical Sciences and Nursing Research (IJMSNR) is open access peer-reviewed and referred international online scholarly journal. [1] This international journal is mainly concentrating on medical sciences including 66 topics of medicine. [2, 3] IJMSNR has extended its area of publication of research articles related to nursing and its associated subject/topics. [2] This journal indexed many renowned databases. [3 – 6] Many journals are there, and why this IJMSNR is important and very much essential to the young researchers. Journal will help to the young researchers “How to write a research article? and How to reply to the reviewers’ comments in good manner?” and give necessary instructions already given in the journal website. [7] In editorial articles, the articles related to those who were expertise in their subject area. As an editor of IJMSNR, I have written the editorial articles related to Medical Entomology, its uses, future usefulness, and its implementation in the modern research fields/areas. [8 – 13] In this article, I discussed about IJMSNR scholarly journal, its importance, and mention its impact in the research World.

Indexation and Abstracting of IJMSNR

So many journals in both online and print versions are available in the present research World. This scholarly journal is available in the online version only. IJMSNR journal is indexing and abstracting in many well-known databases as shown in **Figure–1**. This is online, double-blind peer-reviewed journal. Peer reviews comments are confidentially preserved as per journal rules and regulations. Abstracting in well known databases. **The journal with the following abstracting partners:** Google Scholar, Index Copernicus, CrossRef, Academia, Indian Citation Index, Advanced Scientific Index, EuroPub, IJI Factor Indexing, ResearchBib, Eurasian Scientific Journal Index, CiteFactor, WorldCat, Internet Archive (USA), [14] ROAD–Directory of scholarly open resources, Zenodo, Scilicet, SlideShare, KODUS, COSMOS, Publons, OpenAIRE Explore, Semantic Scholar, and Directory of Research.

Journals Indexing (DRJI), BASE (Bielefeld Academic Search Engine), Scientific Journal Impact Factor (SJIF), Sherpa Romeo, ISI Impact Factor (IIF), Root Indexing, and Mendeley. [14]

Importance and Scope of IJMSNR

IJMSNR scholarly journal is an essential and important for the new generation of research world. Because, it is good journal, cost effective, peer-reviewed journal, the process of double-blind review and communication to the researchers are in good manner and prompt communication to the respective researchers. Publishing the research articles once in three months promptly as per the researchers. It is a science, biomedical and healthcare science international online journal with international level of circulation quarterly. It publishes original communications of science, and biomedical research that advance or researchers’ views on medical science or which are to educate and giving important science knowledge to all the journal readers. It is issued quarterly, in four volumes per annually/year. Moreover, clinical aspects which contain original investigations related articles/manuscripts will be considered for its publication. Also, the articles which cross the boundaries of specialties or are of sufficient novelty and importance that the journal’s readers, whatever be their specialty, should be

made aware of the findings in an understandable way. [15]

Conclusion

From this, I have concluded that this scholarly IJMSNR journal as a significant role in the World of Research. Motivated the young researchers has to do research in the study period and in their profession. IJMSNR journal has to insist Medical Entomology discipline education is needed in school level itself to educate ME in the student level. Then only Government of India to control the vector borne diseases in the community level successfully. Moreover, journal reveal that the Medical Entomologist posts are mandatory in medical colleges to teach ME to the UG and PG medical students. It is an important and essential subject in medical curriculum in India.
